Floor heating thermostat with floor and room sensors

Usage

- Home environment

Knob

- ✓ Simple and user-friendly

EB-Therm 55 is a simple underfloor heating thermostat with an analogue lockable control to regulate the temperature and an on/off button that shows if the underfloor heating is in operation. The thermostat is microprocessor controlled, which means that the temperature fluctuations are minimised and it provides even heating. EB-Therm 55 can be used as a floor thermostat, room thermostat or as a combined room thermostat with overheating protection in the floor.
